### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Upite on June 22, 2005.

The application has been amended as follows:

Cancel claim 1 and insert new claim 1 as follows:

--A process for the domestic treatment of clothes, said process comprising the steps of:

a) obtaining a composition comprising a perfume and from  $1 \times 10^{-7}$  g/g fabric to about 0.3 g/g fabric of an aminosilicone containing a sterically hindered functional group;

b) adding said composition to either a domestic laundry machine or a domestic manual trigger sprayer;

c) contacting said clothes with said composition either in said domestic laundry machine or with said domestic manual trigger sprayer.—

cancel claim 2

Cancel claim 14 and insert new claim 14 as follows:

--An article of manufacture comprising:

Art Unit: 1751

- a) a composition wherein the composition comprises a perfume and from  $1 \times 10^{-7}$  g/g fabric to about 0.3 g/g fabric of an aminosilicone containing a sterically hindered functional group; and
- b) a domestic manual trigger sprayer.

The following is an examiner's statement of reasons for allowance: Applicants have claimed a domestic fabric treatment process according to claim 1 above. The closest prior art of Canivenc et al, US 5,540,952 teaches an industrial textile softening process using a composition comprising a polyorganosiloxane with a sterically hindered functional group (see abstract). The composition of Canivenc, however, is solely directed to an industrial fabric treatment process. In column 9, lines 32-37 of Canivenc it is taught that "In the process according to the present invention, in order to apply the composition comprising the polysiloxane to the fabric to be treated, use is made of the conventional techniques of the textile industry, especially by resorting to the impregnation technique known as padding." The present claims are drawn to a domestic process and contain a positive method step which requires adding the composition to either a domestic laundry machine or a domestic manual trigger sprayer (emphasis added). "Conventional techniques of the textile industry" do not include domestic laundry machines and manual trigger sprayers. It would not have been obvious to one of ordinary skill in the art to use the industrial process of the prior art in the domestic process presently claimed. Accordingly, the present claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
